Fortunes change for the Randolph planters after the Revolutionary War, as they face decreased tobacco production and payment of prewar British debts.

Intermarriage brings conflicts, seduction, scandal, schism and madness. Jefferson becomes president and other Randolph men serve as governors, congressmen and justices, involved in the Aaron Burr trial, an impeachment, and the Louisiana Purchase.

The women manage plantations, have numerous pregnancies and endure unhappy marriages. After her eviction from home, one goes to New England and her marriage to a Northern aristocrat sets off vindictive repercussions and another scandal.
